

Reflex Manufacturing

The ability to carefully track costs is critical to profitable manufacturing. Reflex Manufacturing provides the information that gives you true bottom-line costs by component, by home or by project so you know what to build to make the greatest profit. Reflex allows you to track costs at a granular level, from purchase and inventory of raw materials, building and stocking components to relieving inventory from your plant. The Reflex Manufacturing Module is also fully integrated with payroll to track standard or actual costs of labor involved in the manufacturing process.

MRP – Materials Requirements Planning

- Build for stock, build to order, assemble to order and mixed mode – custom, repetitive and engineer to order operations

Perpetual Inventory

- Track multiple warehouses, units of measurement, part numbers, default suppliers and many other attributes
- Track costs as weighted average, FIFO, or standard
- Barcode materials to streamline process flow
- Updated through purchasing of materials and receiving into the warehouse
- Reorder / Trend Analysis – EOQ (Economic Order Quantity) and Minimum / Maximum

Work Orders

- Build for stock work order processing - independent of the sales order system
- Build modular or panel components and update back into inventory with applicable standard or actual labor costs
- Automatically generate material purchases if inventory on hand is insufficient
- Generate Bill of Materials and Bill of Labor
- Multiple order types – internal, external, recursive

Sales Orders

- Automatically generate all applicable work orders for materials, components and assembly
- Allocate raw materials and costs up front or when completed
- Extensive quote management
- Automatically generate material purchases if inventory on hand is insufficient
